The Dean of the Faculty of Biology and Environmental Protection announces an open call for lecturers for the Project

"Universitas Copernicana Thoruniensis In Futuro - modernization of the Nicolaus Copernicus University as part of the Integrated University Program"

Module 1 Education programs

The main goal of the project is the development of the scientific and educational potential of the Nicolaus Copernicus University in Toruń in 2018-2022, and the adjustment and implementation of education programs to socio-economic needs at the national and regional level, aimed at equipping master students of ***Molecular Diagnostics*** with practical abilities.

Lecturer's task is to conduct a two-hour specialized lecture, aimed at extending the scope of the study program towards current methodological developments in molecular biology and a modern look at the problems related to the use of molecular diagnostics in various fields.

The offer is addressed to eminent scholars from reputable foreign and domestic institutions, who conduct research in the fields related to molecular biology and to specialists/practitioners with achievements in the implementation of research or technologies in molecular biology.

Prerequisite for joining the project is signing a contract with NCU.

Project Coordinator at the Faculty of Biology and Environmental Protection

Prof Dr hab. Werner Ulrich
